The Current Exhibit is : <i>Trevor Paglen: the most merciful thing in the world</i> . <i>Trevor Paglen: the most merciful thing in the world</i> features photography, video, and sculpture spanning a twenty-year period, presenting works that activate—through telescopic and computer vision—new ways of |

seeing the world while revealing what is designed to remain unseen within systems of surveillance or military power. The exhibition subtitle is borrowed from science fiction writer H. P. Lovecraft (1890–1937): “the most merciful thing in the world” is our ignorance, which ultimately protects us from fully comprehending the vast and terrifying universe. Across multiple distinct series, this exhibition examines how human interactions with technology—from telescopic views of military sites and the cosmos, to interactive facial-recognition technologies, to the darker prospects of AI-generated imagery and alternate-reality games—test the capacities of human perception and cognition.

This presentation will take us into the world of four mythological women, all different from one another, yet all crucial to Odysseus’ tale: Calypso, the powerful, loving nymph; Nausicaa, a young girl growing up; Circe, the enigmatic witch; and Penelope, Odysseus’ wife, his perfect match in skill and cunning. Together we will explore the world of these |

mythological women and their differences. We will also combine each woman to a specific score the talented musicians of our Cincinnati Symphony Orchestra will provide us. These four pieces will better capture their emotions during Odysseus' quest, as we turn the spotlight from the hero to their female companions.
